

## iSeries Linux

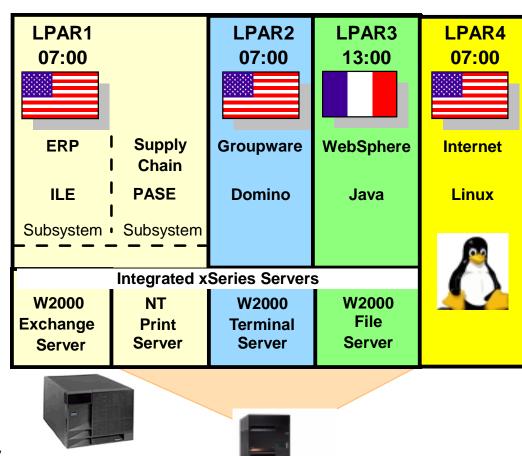

## iSeries Consolidated Server Strategy

# Single server, multiple applications

- LPAR for iSeries and AS/400
- Domino for NT Domino
- iNotes for Exchange
- Linux partition for Linux or NT consolidation
- OS/400 PASE for Ported UNIX applications
- ► IXS/IXA for Windows applications

# Supported across the iSeries product line

Incorporates eServer technology

## Linux Marketplace

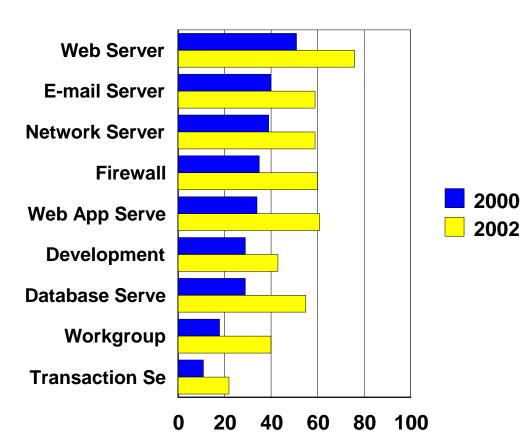

## Linux shipments projected to show the highest growth rate of any operating system in the next three years\*

Driving Cross Industry Support: Hardware, Software, Services

## **Linux Usage Intentions**

	Today	In 12 Months
HTML Server	45%	68%
E-mail Server	50%	66%
Web Application Server	43%	65%
Intranet Server	49%	64%
Firewall	48%	63%
File and Print	50%	62%
Software Development	43%	58%
Database Server	38%	50%
Non-Internet, non-Web	33%	49%

Zona Research Market Survey of IT and ISP customers with buying authority: 10/2000

Functions for Which Linux is being used (2000 vs 2002) - IBM

8 2002 IBM Corporation iSeries Linux.pdf--3 02/12/2002

<sup>\*</sup> International Data Corporation (IDC) "Server Operating Environments Market Forecasts & Analysis" January 2001

#### Linux and iSeries

## What does Linux Bring to iSeries

- Applications
  - e-business infrastructure
  - New generation of web-based applications
  - Provides flexibility and choice of environment
  - Ease delivery of open source components
- Resources and Skills
  - Leverage virtual worldwide development team
  - Broad skill base to deliver iSeries solutions
  - Leverage other IBM investments in Linux

## What does iSeries Bring to Linux

- Ability to consolidate multiple Linux servers
- A reliable, scalable server to run Linux
- Resource sharing and management
- Integration with OS/400

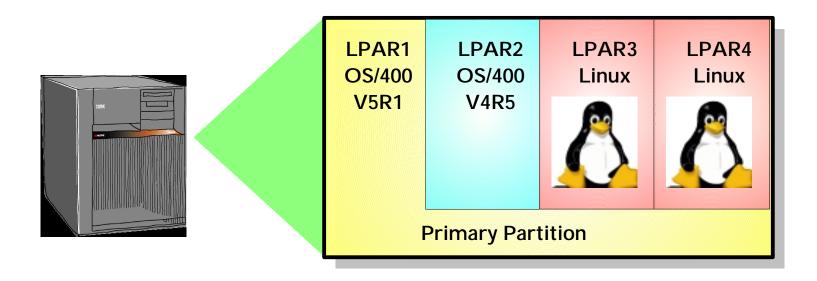

#### IBM eServer iSeries Wins "Best of Show"

LinuxWorld
San Francisco, CA August 28-30

#### Linux on iSeries

#### Consolidate up to 31 Linux servers on one iSeries server

- Linux runs in iSeries logical partition
- Move processor, memory, and I/O resources between partitions
- ► Supported with V5R1 on iSeries Model 270, 820, 830, and 840

## I/O Flexibility

- Virtual Linux shares OS/400 managed disk, tape, CD-ROM, and LAN resources
- ► Direct Linux owns I/O resources

#### Standard Linux from Leading Distributors: SuSE, Turbolinux, and Red Hat

Based on a 2.4, 64 and 32-bit PowerPC kernel

www.ibm.com/eserver/iseries/linux

iSeries Linux.pdf--5 8 2002 IBM Corporation 02/12/2002

#### Linux and LPAR

## Linux runs in a secondary partition

Requires OS/400 V5R1 Primary Partition

# **Shared Processor Support for SStar Processors**

- On selected iSeries 270 and 8xx models, Linux can share a processor with other Linux or OS/400 partitions
- Up to 4 partitions per processor
- Minimum 0.10 processor in a partition
- Minimum processor movement: 0.01

# **Dedicated Processor Support for IStar Processors**

- On selected 8xx servers, Linux requires dedicated processors
- ▶ 1 partition per processor
- Minimum processor movement: 1

#### **Resource Movement**

- ► Processors, Memory, I/O
- Requires IPL of Linux partition

#### **Maximum Number of Linux Partitions**

# of Processors in Server	Maximum # of Linux Partitions*
1	3
2	7
4	15
8	31
12	31
24	31

\* With Shared Processor Support

## iSeries Model 270 Linux Support

## Linux is supported on selected new 270 servers

Requires OS/400 V5R1 Primary Partition

270 Feature #	# of Processors	LPAR and Shared Processor	Supports Linux	Linux Shared Processor
2431	1	Yes	Yes	Yes
2432	1	Yes	Yes	Yes
2434	2	Yes	Yes	Yes
2452 DSD	1	Yes	Yes	Yes
2454 DSD	2	Yes	Yes	Yes

## Linux is <u>not</u> supported on the existing 270 servers

270	# of	LPAR and Shared	Supports	Linux Shared
Feature #	Processors	Processor	Linux	Processor
2248	1	No	No	No
2250	1	No	No	No
2252	1	No	No	No
2253	2	No	No	No
2422 DSD	1	No	No	No
2423 DSD	1	No	No	No
2424 DSD	2	No	No	No

## iSeries Model 820 Linux Support

## Linux is supported on selected 820 servers

Requires OS/400 V5R1 Primary Partition

New 820 servers

<b>6</b> 20	# OI	LPAR and Shared	Supports	Linux Shared
Feature #	Processors	Processor	Linux	Processor
0150	1	Yes	Yes	Yes
0151	2	Yes	Yes	Yes

2419	18/24	Yes	Yes	No

## IBM eServer Offerings for Linux

- Continue Linux eServer Momentum
- Offerings for Server Consolidation
- Announced at LinuxWorld in New York City January 30

#### **eServer zSeries Offering for Linux**

- Enterprise and Internet Data Centers
- Packaged z800 with 1-4 processors,
   z/VM maintenance and support
- ► 20 to 100s of Linux images

#### **eServer iSeries Offering for Linux**

- Small and Medium Business
- ► iSeries Model 820 with 1-4 processors
- ► 1-15 Linux partitions

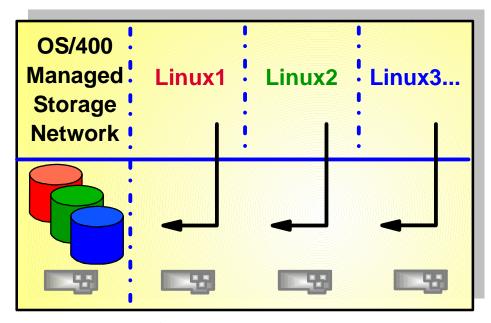

## iSeries Offering for Linux

iSeries Linux Edition

- 1 4-way i820
- up to 32 GB memory
- up to 8 TB disk

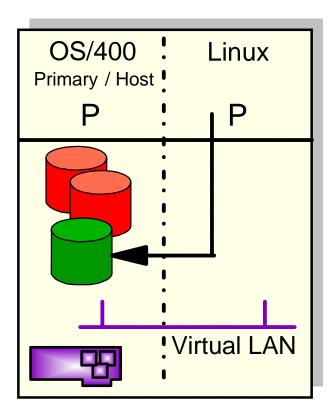

- Consolidated e-infrastructure application server
- Wizard for simple Linux installation and LPAR setup
- Granular logical partitioning, supports up to 15 Linux servers

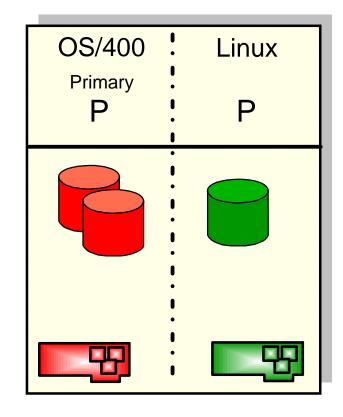

## I/O Flexibility

## Virtual I/O

- Leverage iSeries resources
- ► OS/400 management

## Direct I/O

- Dedicated resources
- Linux management

#### Virtual Ethernet LAN

# Up to 16 high speed TCP/IP connections between partitions

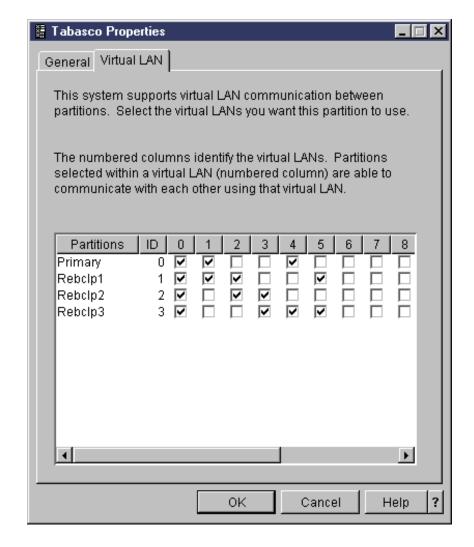

- Emulates 1 Gb Ethernet Adapters
- Selective communications paths between partitions
- Utilizes iSeries memory bus

## No additional hardware required

## Supports communications between

- OS/400 to OS/400
- Linux to OS/400
- ► Linux to Linux

#### Included with OS/400 V5R1

iSeries Linux.pdf--13 02/12/2002

## I/O Devices

#### Virtual

- Devices owned and managed by OS/400
  - Linux started with a Vary On of the OS/400 Network Server Description
- Disk
  - Space is reserved in OS/400 for use by Linux
  - Virtual Storage Spaces easily moved between partitions
- Tape, CD-ROM and DVD
  - Linux has access to all the devices in the hosting partition
- Virtual Ethernet LAN
  - Request from client comes in through other partitions

#### **Direct**

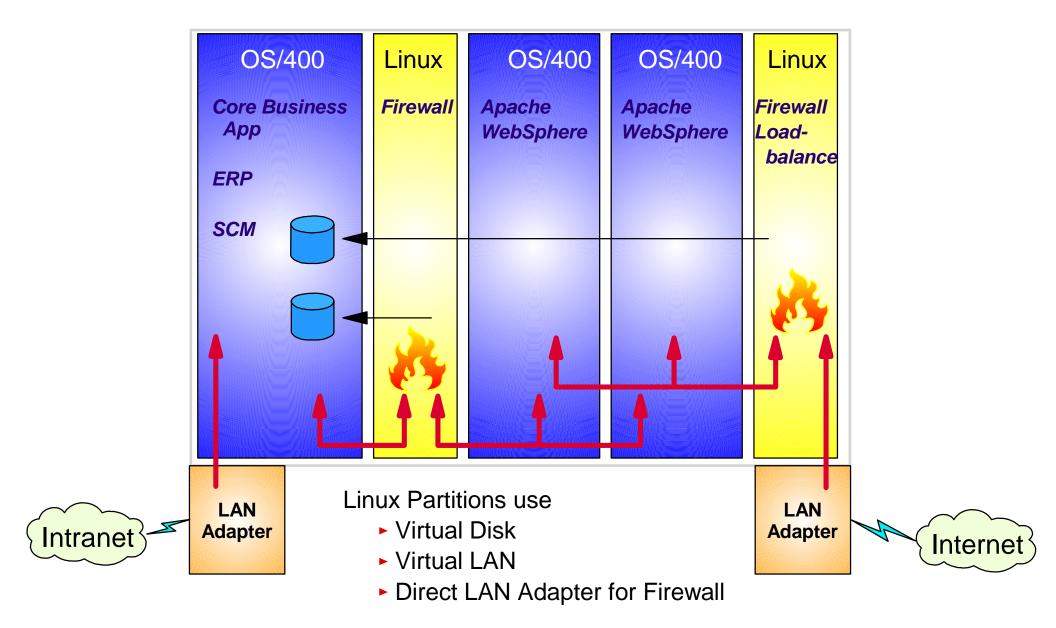

- Owned by Linux
  - OS/400 does not see them
  - Uses iSeries I/O Adapters, IOPs are not used
- Ultra-2 SCSI to connect Disk, Tape, CD-ROM, DVD
  - Hardware RAID and compression are not supported
- LAN
  - 1 Gb Ethernet, 10/100 Mb Ethernet, 100/16/4 Mb Token Ring
- WAN
  - Ordered via RPQs 847141 (#4745 PCI 2 Line WAN IOA) 847142/3 (#2772/3 Dual WAN/Modem IOA)

#### **Console**

- PC with Telnet attached via network to iSeries OS/400 Hosting Partition
- Telnet included with Windows operating systems

## iSeries Linux Example

#### Linux Kernel

Linux consists of one source tree that is compiled for a specific hardware platform to generate a kernel

#### IBM has contributed modifications for the Linux PowerPC kernel

- ► 2.4, 32-bit Kernel
- Architecture Independent Code no changes
- Architecture Dependent Code some changes
  - Device drivers to direct and virtual iSeries I/O
  - Get Time of Day from iSeries
- These modifications are Open Source
- These modifications are available on Linux PowerPC web sites
  - http://linuxppc64.org/
- ► These modifications are expected to be apart of the Linux kernel for PowerPC

#### **Linux Distributions**

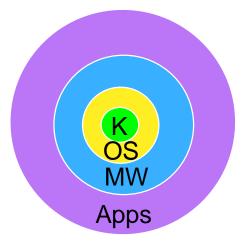

#### **Distributors**

- Use PowerPC kernel with iSeries modifications
- Add Operating System, Middleware, and Application components on top of Linux kernel
- ► The things that most people are using Linux for come with the distribution

**Example**: Functions included in Typical Distribution

Functions	Key Middleware and Applications
Web Serving	Apache, PHP,Tux, thttpd, Zope
Mail Serving	sendmail, postfix, exim, WU IMAP
Print Server	Iprng, cups
File Server	Samba, NFS
News Server	INN
FTP Server	w-ftpd
Firewall	NetFilter
DHCP	dhcpd
DNS	bind

#### Distribution

Kernel +
Operating System +
Middleware +
Applications =
Distribution

#### Linux for iSeries

#### **Available from distributors**

## SuSE Linux Enterprise Server 7

- Announced January, 2002
- Replaces SuSE Linux Developer Edition for iSeries
- http://www.suse.com/us/products/suse\_business/sles /sles\_iSeries\_pSeries/index.html

#### Turbolinux 6.5 for iSeries

- General Availability August, 2001
- http://www.turbolinux.com/products/iseries/index.html

#### Red Hat 7.1 for iSeries

- General Availability 1Q 2002
- http://www.redhat.com/software/linux/ibmseries/

## Support for Linux on iSeries

#### Support is available for Linux on iSeries from distributors

- SuSE
- **■** Turbolinux
- Red Hat (when available)

#### **Support for Linux on iSeries from IBM**

- IBM Support Line provides answers to usage questions and suspected Linux code defects
- Requires Linux SupportLine contract

#### Support for the Integration of iSeries, OS/400 and Linux on iSeries

- Asking questions regarding OS/400 logical partitioning and reporting suspected defects in the OS/400 implementation of logical partitions are included within the IBM Support Line OS/400 offering contract.
- The OS/400 Support Line representative will attempt to answer basic Linux on iSeries installation questions.

#### IBM Middleware

#### JavaJ

- IBM JVM 1.3 included in SuSE Enterprise Linux 7 for iSeries, SuSE Developer Edition for iSeries, and planned to be available for Red Hat Linux 7.1 for iSeries
- iSeries Toolbox for Java provides access to DB2 UDB and OS/400 Services

#### **DB2 UDB for Linux**

■ Technology Preview planned 1st quarter 2002

## **WebSphere Application Server for Linux**

■ Technology Preview planned 1st quarter 2002

## **Application Sources**

Linux enables a new stream of e-business applications for iSeries

## **PowerPC Linux applications**

- Will run out of the box
- ▶ iSeries, pSeries, Apple PowerBook,,,

## Intel Linux applications

Need to be compiled for PowerPC

## **Open Source Applications**

 Download and compile for PowerPC
 Tomcat for Java Servlets and Java Server Pages http://java.sun.com/products/jsp/tomcat/ OpenOffice - Productivity Suite www.openoffice.org

## **Development Options**

- Linux on iSeries
- PowerPC workstation or server
- Cross Compilers from Intel systems

## PartnerWorld is working with ISVs

## Linux and OS/400 Integration

## File and Print Sharing

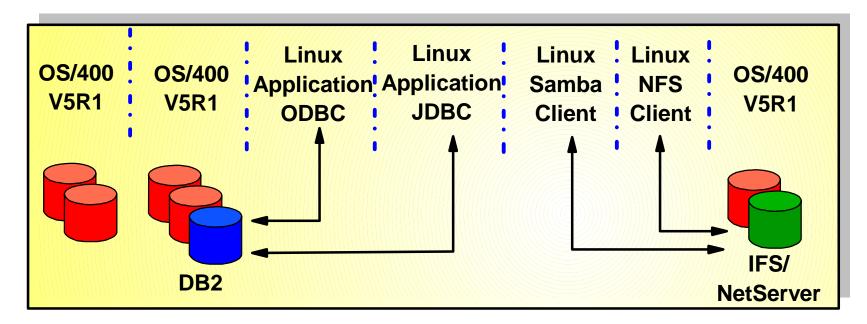

OS/400 NetServer Support for Samba

## File Sharing

NFS

#### **Database Access**

- ► IBM Toolbox for Java including JDBC
- ► ODBC for DB2 UDB for OS/400 (Beta 4Q 01)

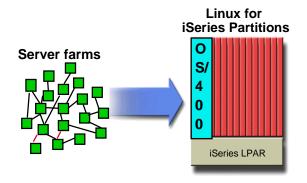

## iSeries Linux Opportunities

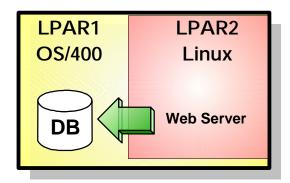

#### **Consolidation**

- Replace Windows or Linux Infrastructure servers
- Run multiple Linux servers in partitions
- Consolidation Lowers Cost of Computing

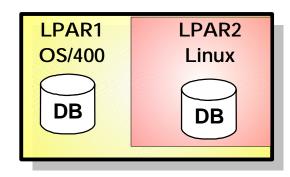

#### Integration

- Extend OS/400 applications with Linux Applications
- ► Run Linux applications on same server as OS/400
- Integration Lowers Cost of Computing

#### **Application Flexibility**

- Leverage Linux LOB application portfolio
- ► Run Linux applications on iSeries
- Flexibility Lowers Cost of Computing

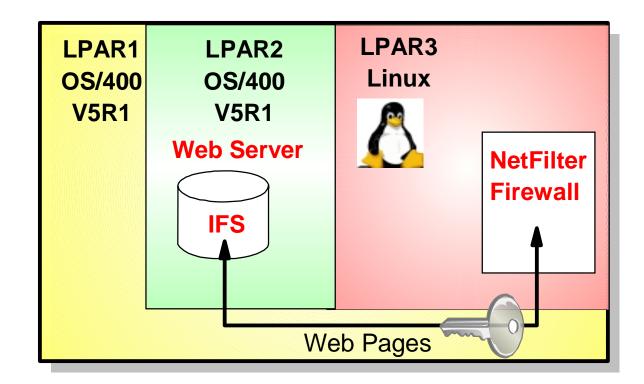

## **Firewall**

#### **Protect OS/400 Resources**

- NetFilter is a Firewall
  - Included in SuSE and Turbolinux distributions

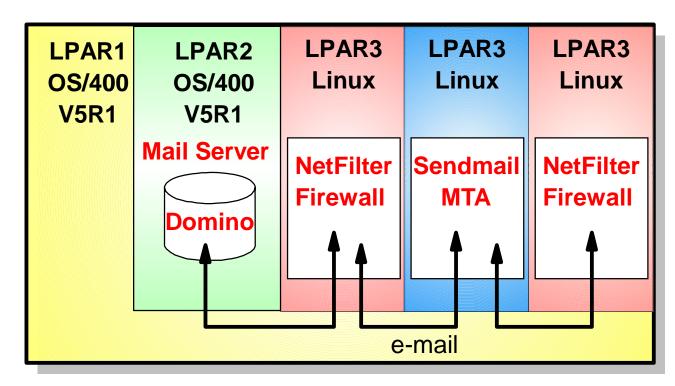

iSeries Linux.pdf--24 02/12/2002

#### Sendmail

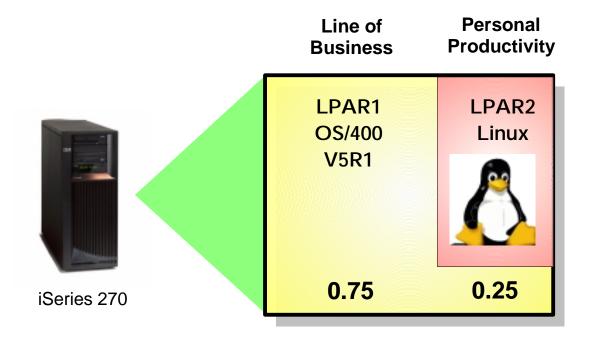

## **Separate Mail Server from Internet**

- Sendmail Message Transfer Agent (MTA)
  - Included in SuSE and Turbolinux distributions
  - High performing reliable mail gateway
- Mail Server Options
  - Domino on OS/400
  - Exchange on direct attach xSeries server
  - IMAP / POP server on Linux

## **Open Office**

#### **OpenOffice**

- Word processor, Spreadsheet,
   Presentation Builder
- Runs on server, GUI sent to X-Windows client
- Open Source Project Millions of Downloads http://www.openoffice.org/

#### **Consolidated Server**

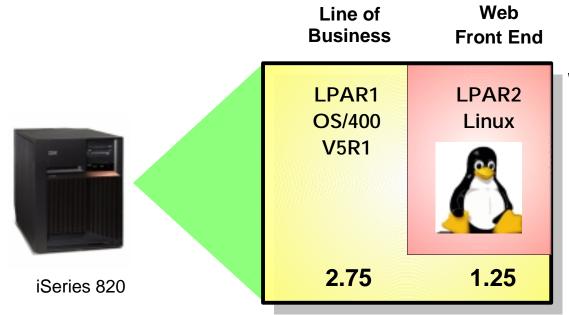

- OS/400 runs line of business applications
- Linux runs OpenOffice for personal productivity applications

## **Inexpensive Linux Server**

- Linux server needs less than a processor, memory, and disk
- Linux shares RAID adapters, tape drives, CD-ROM, and LAN adapters with OS/400

## **Apache**

#### **Web Front End**

- Apache Web Server
- Tomcat App Server
  - http://java.sun.com/products/jsp/tomcat/
- ► IBM JVM 1.3 for Linux PPC
  - Included in SuSE Developer Edition for iSeries
- ▶ iSeries Toolbox for Java

http://www-1.ibm.com/servers/eserver/iseries/toolbox/

## **Extend LOB Applications with Linux**

- OS/400 runs line of business applications
- Linux runs most popular web server
- Java Toolbox provides interfaces to DB2, IFS, Spool files, Systems Values, Messages, Programs, Commands, Data Queues, Jobs, ...

#### **Consolidate Linux Server**

- ► Shared resources reduce costs of managing Linux environment
- Resource movement adds flexibility to support changing workloads

## **Performance Sizing**

Apache is the most popular web server on the Internet

Performance information to assist in selecting the right iSeries server to run a given Apache workload

# of iSeries Processors	0.5	1	2	4
# of web server hits per second, Apache	514	1024	1878	3755

The performance results are based on information collected by IBM in December 2001 and January 2002. The specific configuration used includes

- ► Model 840 with 600 MHz CPUs
- ▶ 1 to 4 Processors in Linux partition
- ► Memory 512 MB to 16 GB
- ► OS/400 V5R1 with latest Linux related PTFs
- ► SuSE Linux Distribution
- ▶ 64 bit PowerPC kernel 2.4.13
- ► Apache release 1.3
- khttp daemon

The information in this document is subject to change without notice. IBM assumes no responsibility for any errors that may appear in this document. The performance information in this document is for guidance only. System performance is highly dependent on many factors including system hardware, system and user software, and user application characteristics. Customer applications must be carefully evaluated before estimating performance. IBM does not warrant or represent that a user can or will achieve a similar performance. No warranty on system performance or price/performance is expressed or implied in this document.

## iSeries Linux Applications

## Infrastructure / edge server

- Samba
  - Linux Distribution -Windows File/Print Server
- Apache
  - Linux Distribution -Web Server
- Sendmail MTA
  - Linux Distribution Mail Transfer Agent
- H.A. Clusters for Linux
  - H.A. Solutions Technology detects failures and kick off recovery.
- H.A. EchoStream Data Replication
  - H.A. Solutions Technology automatically replicates data in real time.
- VigilEnt Security Agent for Linux on iSeries
  - PentaSafe Security Technologies auditing, security management
- PATROL system-management
  - BMC service-level management

#### Web enablement / e-business / tools

- Tomcat
  - Open Source Web Application Server
- Open Office
  - Open Source Office Suite
- ► IBM JVM
  - Linux Distributions Java environment
- ► IBM Toolbox for Java
  - Open Source Access to OS/400 services
- DI Atlantis Solution
  - Dimensional Insight, Inc. BI applications
- Parallel Sort Engine and ETL Interface
  - Cosort sorting and flat-file ETL technology
- e-VoiceTour
  - Real Person Internet publishing, sales force presentations and web-based training.
- Web.up
  - Query web publisher

## **Industry / SMB**

- eMerchant
  - Magic Software CRM solution.
- Linux General Ledger
  - Linux Business Accounting Systems small to medium company general bookkeeping.

#### iSeries Linux Test Drive

## **New Porting /Testing Resource for ISVs**

- Announced December 2001
- iSeries Linux Partitions Accessible over Internet
- Goal is to rapidly increase the number of Linux applications available

#### **Process**

- ► ISVs fill out nomination

  http://www.iseries.ibm.com/developer/factory/testdrive/index.html
- Free and Fee Options
- Shared and Dedicated Partition Options
- SuSE and Turbolinux available

#### **Results in 1st Month**

Over 400 Nominations

#### iSeries Linux Success

## Large retail customer with 450 in-store iSeries systems

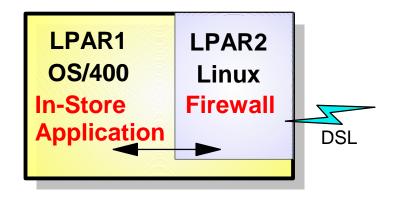

- Current network is Frame Relay and X.25
- Moving to DSL....but needed a firewall

#### **Municipal Government**

- OS/400 partition running all of the city's major financial applications
- OS/400 partition as a hot backup partition for the public safety server
- ► Linux for Web Server and Firewall

## Large supplier of electronics products (80,000 products)

- Moved Linux applications from stand-alone Intel boxes to iSeries
- Squid, SAMBA, e-mail

Please send Craig Johnson - johnsonc@us.ibm.com - your iSeries Linux success story

#### Churchill China

#### The Challenge

The need to develop a robust and scalable commerce for e-business supply chain management system

#### The Solution

An ideal system for Churchill's needs was developed using Wizz400, a Clover product, running in a Logical Partition (LPAR) environment, with a Linux based firewall system on a powerful iSeries \* Model 820

#### The Benefit

Churchill now have a solution that perfectly meets their commerce for e-business supply chain management needs and is scalable to meet the company's future needs.

"iSeries has dramatically reduced our costs by providing the power to run different applications on different operating systems on a single machine. The legendary reliability of the system makes it the perfect platform for taking our business online."

David Garnett, Information Technology (IT) Director, Churchill China

## Linux on iSeries Advantages

#### **Server Consolidation**

- OS/400, Linux, and Windows 2000 Server
- Support for up to 31 Linux partitions

## **Resource Sharing**

- Partitioning
- Shared Processors
- Virtual I/O: Disk, LAN, Tape, CD-ROM

#### Minimal Hardware Requirements for a Linux Environment

- Part of a processor, memory
- Virtual I/O: Disk, LAN, Tape, CD-ROM

#### Reliable Server

- Leading single server availability
- Unique virtual disk support provides excellent test/development environment

## **Storage Area Network facilities**

- ► Full OS/400 system backup provides disaster recovery for Linux virtual disks
- Linux backup saves daily Linux files changes direct to iSeries tape device

## **OS/400 Integration**

## Linux for iSeries Information

## **Additional Solutions are Coming**

- Watch for ISV announcements
- iSeries Linux Test Drive

#### **Events**

- ► IBM Linux Roadshow
- LinuxWorld
- PartnerWorld
- Common

## **Stay Connected**

- ► iSeries Linux newsletter
- Send note to johnsonc@us.ibm.com

#### Resources

- http://www.ibm.com/eserver/iseries/linux
- iSeries Linux White Paper
- ► iSeries Linux Sales Guide
- iSeries Linux Apache Sizing Guide
- Redbook
- ► 3-Day Implementation Class
- Consulting Engagements for Planning
- Sales Contacts
  - Americas Kevin Klora
  - EMEA Imran Waheed
  - AP Mahesh Ramanayake

#### **Product Directions**

- ► 64-bit kernel support
- Additional iSeries OS/400 Integration
- LPAR Enhancements

## **Linux for iSeries Summary**

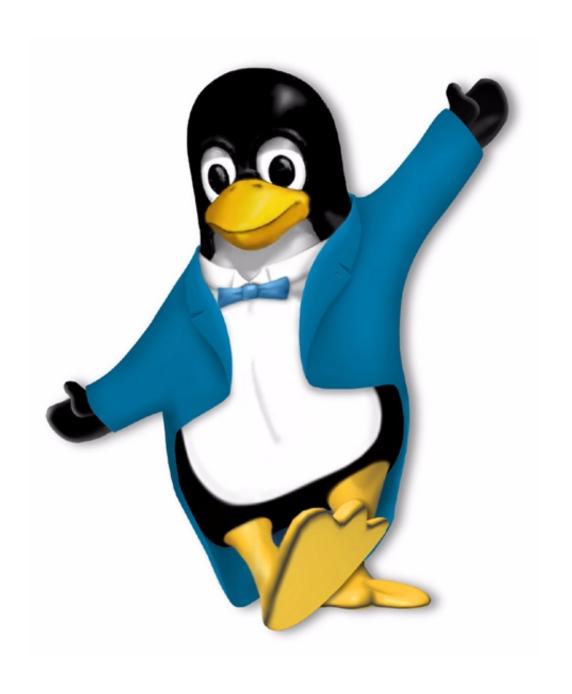

Linux for iSeries is available from distributors

iSeries offers consolidation solution for Linux by leveraging LPAR and Virtual I/O resources

OS/400 applications can be extended with Linux Offerings

www.ibm.com/eserver/iseries/linux

iSeries Linux.pdf--37

Information is provided "AS IS" without warranty of any kind.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information in this presentation concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only. Contact your local IBM office or IBM authorized reseller for the full text of the specific Statement of Direction.

Some information in this presentation addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Photographs shown are of engineering prototypes. Changes may be incorporated in production models.

iSeries Linux.pdf--38 02/12/2002
